Thorntons also recently introduced Unleaded<sup>15</sup>, Thorntons' branded E15 fueling option, to guests in its Chicago area market. Unleaded<sup>15</sup> (up to 15% ethanol, 85% gasoline) provides an octane rating of 88, and is the most widely-tested fuel ever introduced to consumers. It is approved by the EPA for use in model year 2001 or newer cars, light duty trucks, SUV's and Flex Fuel™ vehicles. This fuel is believed to deliver better performance and fewer harmful emissions.

Unleaded<sup>15</sup> differs from E85, in that E85 is a Flex Fuel that is a mixture of up to 85% ethanol and 15% petroleum. Today, the vast majority of domestic ethanol is produced from corn, an abundant and renewable grain. This renewable fuel source helps to reduce carbon emissions, helps promote cleaner air, boosts the United States economy, creates jobs, and reduces foreign oil imports.
